EXHIBITION AND DISPLAY SOLUTIONS

The World's first fully flexible display

Flex the entire display to create the shape you need at each venue

Stunning looks, infinite flexibility and very easy to use - ISOframe Wave is the portable display system exhibitors have been waiting for:

- ISOframe Wave links flexible graphics over any length of display which can then be sculpted to follow almost any shape.
- Our patented ISOframe Wave is the worlds first fully flexible display stand - choose the shape and size you need whilst you're setting up the event.
- All Wave graphics are the same width so you can interchange add or delete sections to create the look and size you need.
- No tools assembly means set-up is both fast and easy.
- Flexi-wave link produces a strong, stable framework whatever shape you create.
- Auto-float means graphics align even if the floor is not level.
- Strong enough for heavy items such as large TFT screens.
- Table attachments fit in seconds without tools.

See how flexible your ISOframe Wave kit can be! These 3 layouts and many more are possible with the same frame and graphic set.

ISOframe[®] exhibit 800

Professional displays for the self-build exhibitor

Using our tool free FAST clamp, frames are built in minutes

ISOframe 800 uses our patented FASTclamp tool-less connector and self-aligning graphics to create stunning exhibition stands quickly and easily:

- No specialist trades are required during set-up. This coupled with reduced storage and transport costs, not to mention the re-usability of the system, means exhibiting becomes a lot more cost effective with ISOframe 800.
- Choose from a huge range of pre-designed stands or let us design a 'bespoke' stand for you from your own brief.
- Our special corner profiles allow seamless graphic corners without the need to re-size graphics or use special sized bars, allowing quick stand builds and interchangeable graphics.
- Re-configure the stand design without reprinting graphics. Maximum flexibility - minimum cost.
- All stands are supplied with full colour instructions for easy assembly.

FASTclamp™ connects the framework instantly without tools

Push to lock and lift to release. So simple, quick and easy, anyone can build our exhibition systems.

ISOframe[®] Compact

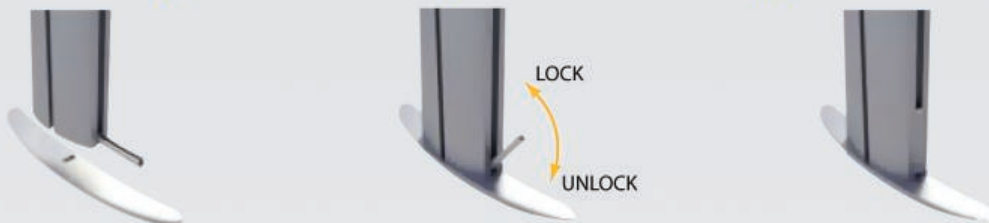

Tool-less presentation system

For portable or semi-permanent installations

Our semi-permanent display system is aimed as a bridge between pop-ups and modular display systems:

- Three style options to suit every application - Oval, Flying Oval or Graphic Wing.
- Four graphic options - PVC banner, flexible roll-up, rigid mount-on or mount-in graphics.
- Display size can be extended or reduced depending on your needs.
- All Compact graphics are 800mm wide to allow you to interchange, add or remove them easily.
- All kits can be supplied in either rigid wheeled cases or soft padded wheeled cases and will easily fit into the boot of a car.
- i-Line Intelligent Graphic Alignment System makes hanging graphics quick and simple.
- Attach a large range of accessories such as shelves, TFT screens, table attachments and literature holders.
- Choose straight or curved displays or a combination of both.

FASTclamp™ connects the post to the base support instantly without tools

Push to lock and lift to release. So simple, quick and easy, anyone can build our exhibition systems.

Graphic Ends allow for your company name or web address to be seen by people approaching the display from the side.

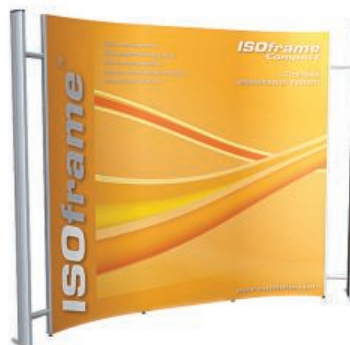

Also shown here is a keyboard table and TFT mount. As with all Compact kits, we can customise them to suit your individual requirements.

Table Attachments

Flying Oval Ends create a great look as a real alternative to traditional pop-up stands.

All graphics are 800mm wide to allow for extending the stand. Graphics are interchanged easily without any size issues.

Post TV Mount

Oval Ends have graphics fitted close to the oval post using our specially designed profile to keep all the horizontal bars the same length and all the graphics 800mm wide. These products have been designed with ease of use and speed of assembly in mind.

Integrated TV Mount

A PVC Banner option is available in 800mm, 1600mm and 2400mm wide options.

A low-cost, elegant and very popular solution due to its single piece graphic.

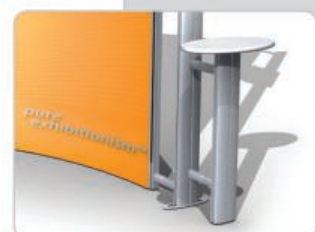

Front Table Add-on

Multiple straight or curved panels can be separated by oval posts to create unique displays.

Accessories such as monitors or tables can be attached to the oval posts where required.

Side Table Add-on

The second version shown here is very effective in showroom environments where a display is required that does not totally block off different areas.

Literature Holders

The lightweight self-build tension fabric system

Perfect for shell cladding or as a freestanding structure.

An ultra quick tool-less system with easy to transport silicone edged printed fabric graphic panels:

- 15 times faster to built than conventional tension fabric frameworks.
- Silicone edged fabric simply glides into a channel in the metalwork to create a stunning, high impact design.
- Extremely portable, lightweight graphics.
- Attach media screens and literature holders to suit your design
- Backlit and wall mounted versions are also available.
- Continuous, unrestricted fabric graphics.
- FASTclamp tool-less assembly and no need for screws.

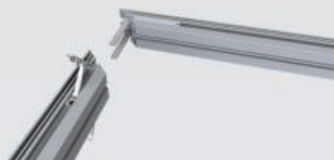

FASTclamp[™] creates perfect mitred corners

Insert angle brackets into the profile.

Snap the FASTclamp closed to secure.

Repeat with the second profile.

A strong, secure connection without any tools.

Media Kits

Free-standing media screen holders

Off the shelf or custom made

Sometimes a simple free-standing media screen can attract a lot of attention to your stand. Now with touch screen monitors getting cheaper, you can use media systems to collect visitor information or engage them in many other interactive ways.

We are able to supply off the shelf solutions or create a custom 'pod' to your brief. Whether it is a simple screen to play a video or something more interactive such as a counter with an integrated touch screen built into the counter top.

Working with our AV partners we are also able to design and produce your multi-media presentation.

ISOframe[®]

Express pop-up

Versatile and expandable pop-up systems

The ease of a pop-up with much more to offer

We build all of our Express pop-ups by hand in the UK and each one comes with a 10 year guarantee giving you peace of mind for your purchase:

- Ultra slim framework that's only 200mm deep to maximise floor space.
- Square ends mean easy to hang graphics that stay attached. Square ends also mean more space in shell scheme stands as the framework fits right up to the edge.
- Super strong cross-braced frames which can accept large media screens, tables or shelves and attached in seconds.
- Standard height is 2.25m and so fits perfectly inside shell scheme. Framework can be extended to 3m or even 3.75m high.
- Separate frames can be linked in a straight line, curved or right angled corners.
- Choose from our standard range or allow us to design a special stand to suit your floor space and brief.

Cross braced framework for extra rigidity and durability

ISOframe Express pop-up kits come in a single framework set-up so no need for linking panels. Our cross-braced frames ensure your graphics hang perfectly even on uneven floors.

Example Express pop-up kits

Premium pop-ups

Your graphics will fit perfectly every time

Premium pop-ups are lightweight and extremely strong, our ultra-refined Premium systems use a cross-braced frame along with a hidden magnetic panel hanging system for an uninterrupted graphic display. Available in three heights and widths up to 5 columns. Our Premium pop-ups are available as straight or curved. All of our pop-ups are British made and guaranteed for 10 years.

Starter pop-ups

Low cost without compromise

Starter pop-ups are our value range of displays but still use a cross-braced frame system. Starter pop-ups are available in one standard height of 1980mm. The framework is designed to minimise the waste of graphic material during production so a 2.8m wide Starter pop-up will only use five graphic panels as opposed to a standard pop-up which uses six thereby further reducing the overall cost of the system. All of our pop-ups are British made and guaranteed for 10 years.

Cross braced framework for extra rigidity and durability

All of our pop-ups systems use a cross-braced frame and lock magnetically together. Each kit also comes with a 10 year guarantee.

Starter Pop-ups

Available in 2 different width options

1.93m wide

2.79m wide

Table Top Pop-ups

For small conferences or quick presentations

When a full size display isn't required

We manufacture a small range of table top kits to compliment our large scale display systems. Many of which are used by the pharmaceutical industry for new product launches or promotions due to their small size and ease of assembly.

Our table top kits come in either 1 column (1700mm wide graphic) or 2 column (2400mm wide graphic) widths. These use a single piece graphic that incorporates the end caps and main graphic panel into a single piece wrap.

We also manufacture table top folding kits that can have graphics permanently attached inside the framework or use Velcro compatible panels.

Tool-less tables, counters, plinths and desks

Counters pack flat and assemble in seconds

ISOframe Counters are a cost-effective and versatile furniture solution with interchangeable graphic wraps:

- Ideal for exhibitions or events, a perfect complement to any of our exhibition systems.
- Counters come with a graphic wrap that can be configured with a removable back panel to access internal storage.
- Shelves can be added inside for extra storage.
- Lockable doors can be added to provide secure storage.
- For special projects we can design custom sizes and shapes of table. Example on next page shows a multi tier bar with internal shelves and foot rail.
- Our standard table top covering is silver but special colours and also coverings are available by request.

FASTclamp connects the posts to the base and top without tools

Push to lock and lift to release. So simple, quick and easy, anyone can build our exhibition systems.

Complete exhibition design

Stand design and graphic design provided free of charge

We use the very latest 3D visualisation and CAD software to create concepts through to final designs with finished artwork applied. Our high quality 3D rendered images will give you an accurate feel to how the final product will look.

For larger stands we can even create video walkthroughs before you commit to the final stand design.

Bespoke design

Custom modular stand design provided free of charge

We can design and make special stands or produce bespoke elements for that added WOW factor. Whether it's a specific product display, lighting effect or a hybrid system, we have the design and manufacturing capability to build the stand of your dreams.

Utilise our team of experts to build your stand

A network of stand builders throughout the UK and Europe

We have a dedicated team of professional installers providing full installation and also breakdown anywhere in the UK or the wider world.

We can also project manage your event from liaising with exhibition organisers and venues to ordering services and managing your show marketing material through to post event analysis.

Rental or purchase

Options available on our custom modular exhibition stands

We can help you decide which option will suit you best, based on factors such as floor space and the number of shows you attend. So you can really make the most of your budget, we can offer a combination of purchase and rental.

Showroom available

Our team can visit you or you can visit our showroom

With full size exhibition stands on show, you will clearly see the potential in building your stand with our modular exhibition systems.
